

RESOLUTION NO. _____

ENTITLED: "A RESOLUTION APPROVING THE BUDGET OF THE CHEYENNE REGIONAL AIRPORT BOARD FOR THE FISCAL YEAR BEGINNING JULY 1, 2023 AND ENDING JUNE 30, 2024."

WHEREAS, the Cheyenne Regional Airport Board ("Board") was created pursuant to Ordinance No. 2407 adopted by the Governing Body on February 11, 1980, as amended;

WHEREAS, City Code Section 2.60.050(B) sets forth the requirement that the Board shall submit on or before the first day of May of each year, to the governing bodies of the city and the county, a proposed budget for the ensuing fiscal year;

WHEREAS, City Code Section 2.60.050(B) provides that the Board budget shall be subject to alteration, modification and approval by the Governing Body in accordance with the policies of the City; and

WHEREAS, City staff has reviewed the proposed budget received from the Board.

NOW, THEREFORE, BE IT RESOLVED BY THE GOVERNING BODY OF THE CITY OF CHEYENNE, WYOMING, that the proposed budget for the Fiscal Year beginning July 1, 2023 and ending June 30, 2024 of the Cheyenne Regional Airport Board, as set forth in the attached information with this Resolution entitled "Cheyenne Regional Airport Operating Budget for the Fiscal Year 2024" in the total amount of \$36,083,519.45, is hereby approved.

PRESENTED, READ AND ADOPTED this _____ day of _____, 2023.

Patrick Collins, Mayor

(SEAL)

ATTEST:

Kristina F. Jones, City Clerk

Background

The following pages present the Cheyenne Regional Airport Board's operating budget for fiscal year 2024. The Board consists of five members, two members appointed by the City of Cheyenne, two members appointed by Laramie County, and one member appointed by the City and County in alternating terms. The Joint Powers Agreement sets forth the terms by which the City, County, and Airport operate. Under this agreement, the City and County annually review the Airport Budget. The City and County also sign all FAA grant agreements as co-sponsors. The Board operates under the authority of both an Airport Board under Wyoming State Statute and as a Joint Powers Board and holds ownership of all facilities, equipment, lease holdings, and operating rights.

The Board adopted a Certificate of Organization on July 1, 1980, pursuant to the City of Cheyenne Ordinance 2407 and Laramie County Commissioners Resolution officially forming the Airport Board and electing officers under W.S.§ 10-4-101 through 10-4-107. Under W.S.§ 16-1-104(d), the Airport Board was deemed a joint powers board.

For the year January 1, 2023 – December 31, 2023, the slate of officers is: Keith Zabka, President; Kevin Paintner, Vice President; Dr. Jeff Storey, Treasurer; Melissa Amick, Secretary; and Kim Brokaw, Member.

The Board's fiscal year is from July 1 – June 30 each year. Once the Board approves the budget it is submitted to the City of Cheyenne and Laramie County for review by May 1st of each year.

The Board operates the Airport as a business enterprise to be financially self-sufficient. The Airport does not have the authority to tax and does not use local tax dollars, property tax or sales tax. The Airport is funded through fees paid by airport users, including airlines and businesses that operate at the airport. The airport is a key piece of infrastructure for our community, connecting citizens and employers to the country and globally. The airport supports not just passenger travel, but also the Wyoming Air National Guard and the State of Wyoming, among many other consumers. (<http://www.dot.state.wy.us/home/aeronautics/2020-aviation-economic-impact-study.html>)

Impacts

Air Service

The past few years have had a significant impact on the Airport's air service. During 2020, we saw traveler numbers reduced due to the COVID-19 pandemic. From 2020-2022 we saw decreased travelers due to the runway reconstruction and several required full and partial runway shutdowns.

The Airport's air service began recovering in 2022 with limited capacity air service due to a shortened runway. In November 2022, the Airport was able to return to full air service for the first time since the pandemic. Even with the capacity restrictions for most of 2022, the Airport saw 19,511 enplanements which were up from the 15,888

enplanements in 2019 before the pandemic and runway reconstruction. Commercial air service has once again been fully suspended from April 2023 through September 2023 due to the final phase of the runway reconstruction. We plan to have full air service returning in fall of 2023.

Finance and Administration

The Airport's Administration and Finance departments have seen significant turnover and changes in the last year. With the changes in staff, it has created an opportunity to review the cashflow and capital outlays to ensure the financial plan established with the budget remains on track and is aligned with the budget going forward.

Cheyenne Regional Airport Board Budget Summary

This year we are presenting the budget with two enterprise centers. The enterprise centers include Airport Administration and Operations and Fixed Based Operations (FBO). Revenues, expenses for the various enterprise centers and their associated cost centers are outlined in the following pages.

Presented on pages 4-6 is a chart summarizing the Airport Board's total budget for the fiscal year 2024 (July 1, 2023-June 30, 2024). We are expected to have net operating income of \$132,496 with a net total loss of \$3,082,264 including capital expenses.

Blue color indicates that is an amount received/paid by the Airport. Orange color indicates amounts received/paid using other funds such as 6th penny funds, Wyoming Air National Guard, federal, and state grants.

Airport Administration and Operations

The Airport's operating budget is a stand-alone enterprise center separate from the FBO operations. All revenues generated from the operation of this enterprise center, including rents, commercial landing fees (other than FBO landing fees), and other operating fees, will be used to offset the expenses related to airport operations. This budget year the airport will use Airport reserves for operating/capital expenses in excess of revenues.

The income (loss) from airport operations for FY 2024 is anticipated to be \$(171,420). The specific details for the airport administration and operations enterprise center are outlined on pages 11-14. The Airport's capital plan can be found on page 17.

Revenue

Aeronautical revenues are collected from both the fixed base operator and the airlines as well as other aeronautical users of the airport. Non-aeronautical revenues are collected from a variety of sources including terminal concessions, rental cars, and lease revenue. These revenue streams are used to fund cost-center expenses. There are five revenue centers for airport administration and operations including air carriers, leased space, rental cars, concessions, and other income. The total amount of revenue expected to be collected by Administration and Operations is \$2,335,741. A more detailed review of the anticipated revenues and sources for each of these profit centers is below.

Air Carriers

Air Carrier income is derived from three sources: landing fees, terminal rents, and Passenger Facility Charges (PFC). Landing fees and terminal rent revenues are used to offset expenses related to the airfield and terminal operations. PFC revenues are used to reimburse the Airport for approved projects previously completed.

To be conservative, the budget includes three months with no air carrier income with the exception of terminal rent. Air carrier revenue is hard to predict at this point due to the runway closure. A conservative estimate is \$144,257 for fiscal year 2024. Of this, \$64,056 is terminal space rental, \$11,791 is landing fees, and \$68,410 are PFC's.

Leased Space

The Airport currently has approximately 70 leases with various tenants including the Wyoming Department of Transportation (WYDOT), Wyoming Air National Guard (WANG), the City of Cheyenne, and the State of Wyoming. The leased space includes building rent, land rent, hangar rent (excluding community hangar), terminal rent (excluding rental cars and air carriers), and storage rent. The leased space revenue is used to offset the expenses in the "Leased Space" cost center.

Again, to be conservative, the budget does not include annual increases in rent for inflation as we are unsure what the Consumer Price Index (CPI) will be during FY 2024. Leased space revenue for fiscal year 2024 is anticipated to be \$1,947,896.

Rental Cars

Rental car revenue is predominantly composed of minimum annual guaranteed

amounts (MAGs). The MAGs were suspended during the runway reconstruction and will resume in September 2023. The on-airport rental car companies are required to pay 10% of gross revenue or their MAG, whichever is higher. This is included in the concession revenues below.

The rental cars also pay rent for space in the terminal which is used to offset expenses in the “Terminal” cost center. The rental cars pay rent and utility costs for the use of the wash bay facility. These fees help to offset the cost of operating the wash bay which is included in the “Leased Space” cost center. The amount of rent revenue from rental cars for fiscal year 2024 is anticipated to be \$7,147.

The third type of rental car revenue is Customer Facility Charges (CFC) which are collected and held to offset rental car-related approved projects. This revenue is anticipated to be \$12,604. The rental car revenue for fiscal year 2024 is anticipated to be \$19,751 excluding the concessions.

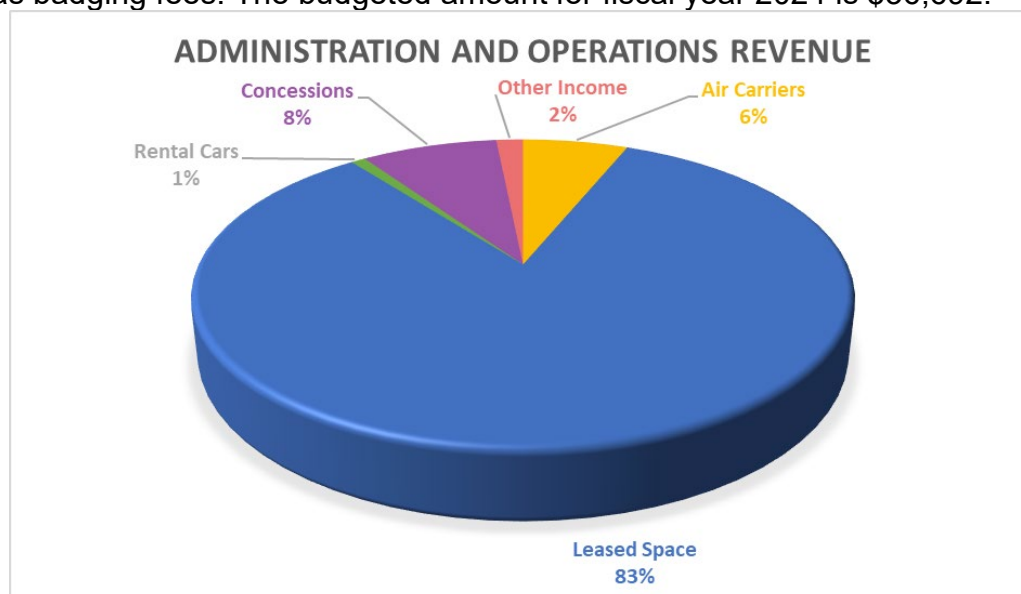

Concessions

Usually, most of the income from concessions is received from restaurant revenue. Due to the suspension of commercial air service, we have not yet charged concessions to the restaurant, and they have not been incorporated into this budget. Other concession revenue includes rental car concessions, ATM concessions, vending machine concessions, and ride-share concessions.

All concession revenue is dependent on activity level and has been adjusted based on anticipated reduced activity during the runway reconstruction. The concession revenue stream helps to fund the “Terminal” cost center. Revenue is budgeted to be \$187,144 for fiscal year 2024.

Other Income

Other income includes interest income, advertising income, and other airport revenue such as badging fees. The budgeted amount for fiscal year 2024 is \$36,692.

Expenses

Throughout this past year the Airport has been planning for a 159-day closure to occur for the runway reconstruction project just prior to the start of this budget (April 4 – September 10, 2023). Additionally, there are several other planned projects we hope to be completed concurrently with the Airport runway closure.

Budgeted expenses for airport administration and operations total \$2,507,160. Operating expenses exclude FBO expenses and capital expenses as those are reflected in separate budgets on pages 15-18 following the detailed cost center information.

The number of full-time equivalent staff for Airport administration and operations (non-FBO) employees is currently 10 with two vacancies expected to be filled for this upcoming fiscal year 2024. Incorporated into the budget is a 5% raise for all full-time employees which will ultimately vary from 2.5% to 5% depending on their annual employee evaluation. Finally, there is a 5% adjustment for increases in health insurance and employer provided benefits.

Also incorporated into this budget is an increase in insurance premiums. This is largely due to the fact that we will assign a commercial broker of record and will be moving our property insurance from Wyoming Association of Risk Management (WARM) to another policy. There is an increase in advertising and promotion for promoting air service returning in September. Finally, we increased the budget for repairs and maintenance and utilities as prices in these areas are anticipated to increase.

There are five direct cost centers for the Airport: Administration, airfield, leased space, other buildings and grounds, and terminal. There are 16 corresponding expense categories. The expense categories include areas such as personnel expenses, utilities and building expenses, operations and maintenance expenses, and equipment expenses.

Administration and Operations Cost Center

This cost center includes all administrative and operations expenses that were not specifically assigned to another cost center. This also includes expenses related to administrative and operations staff expenses.

Airfield Cost Center

This cost center includes the costs associated with the airfield and air carrier apron including snow removal, aircraft rescue firefighting, operations and maintenance expenses, and utilities expenses. This cost center is offset by revenues collected by Air Carriers.

Leased Space Cost Center

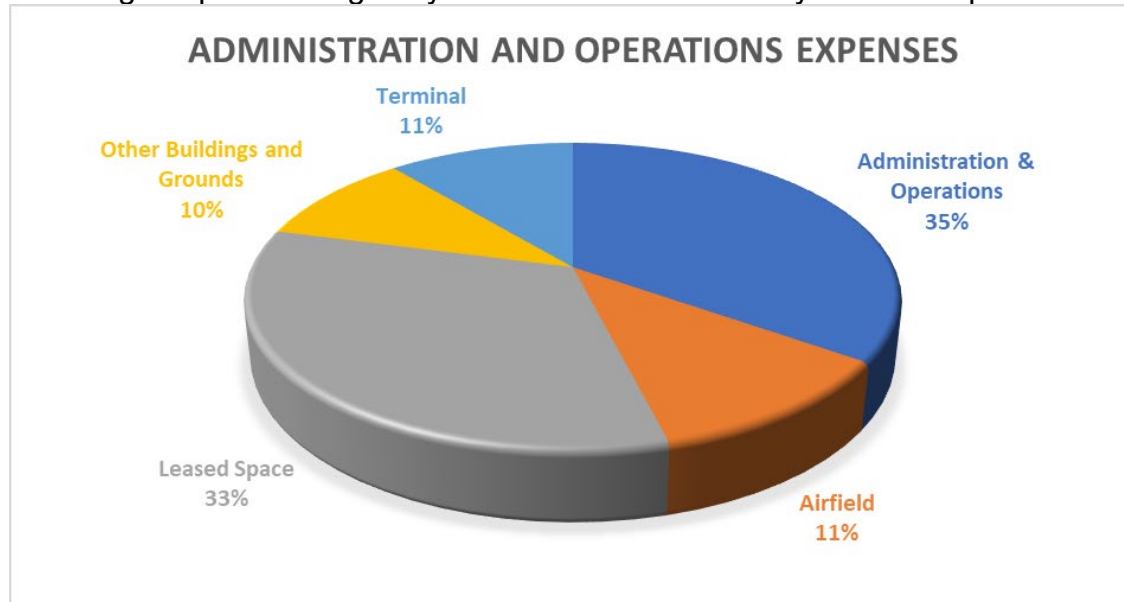

This cost center includes all expenses related to our leased property. This cost center also includes the Airport owned hangars, the rental car wash bays as well as aeronautical and non-aeronautical tenants. This cost center is offset by revenues collected by the Rental Cars and Leased Space revenue centers.

Terminal

Included in the terminal cost center are all costs associated with the terminal building including repair and maintenance, custodial, utilities, the parking lot, baggage system and certain security items related to access control (cameras, doors, alarms). This cost center is offset by revenues collected by Air Carriers, Rental Cars, and Concessions revenue centers.

Other Buildings and Grounds

This cost center includes the expenses associated other grounds at the airport including the parks and grassy areas as well as roadways at the Airport.

	Budget Operating Expense FY 2024	Administration and Operations	Airfield	Leased Space	Other Buildings & Grounds	Terminal	FBO
Personnel Services (Payroll)	1,098,565	617,163	117,383	114,719	233,521	15,779	648,525

Airport Fixed Based Operations (FBO) FY 2024 Budget

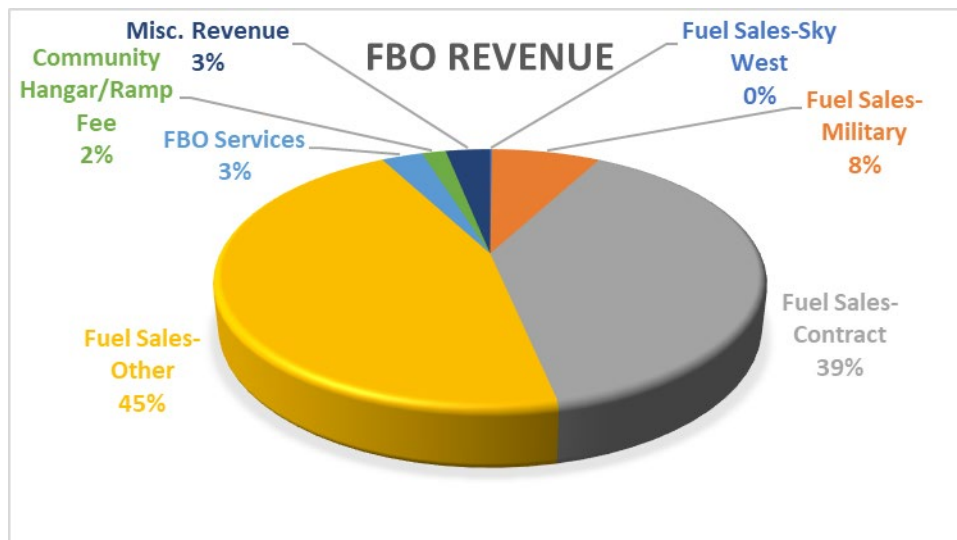

The Fixed Based Operations (FBO) operates as a separate enterprise center. It is anticipated that for FY 2024, the FBO would have a total net income of \$254,917.

Revenues		FY 2024 Budget
	Fuel Revenues	\$ 3,420,675.60
	FBO Services	\$ 108,233.35
	Community Hangar/Ramp Fee	\$ 63,051.80
	Misc. Revenue	\$ 116,583.08
	Total FBO Revenue	\$ 3,708,543.82
Expenses		
	Personnel Services (Payroll)	\$ 648,525.44
	Repairs and Maintenance	\$ 23,482.87
	Utilities	\$ 43,161.01
	Supplies and Products	\$ 11,753.25
	Fuel and Purchases for Resale	\$ 2,636,433.60
	Miscellaneous	\$ 41,271.02
	Total FBO Expenses	\$ 3,404,627.20
	Net FBO Operating Income (Loss)	\$ 303,916.62
Capital Expenses		\$ 50,000.00
	Net FBO Income (Loss)	\$ 253,916.62

Revenues

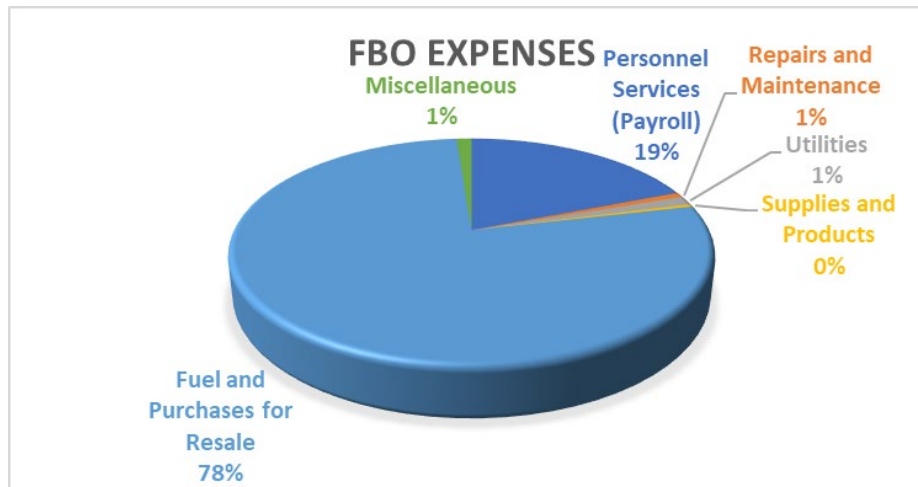

The FBO has the following revenue centers: Fuel sales (Skywest, Military, Contract, Other), FBO services, and miscellaneous revenue.

Due to the runway closure, FBO revenues estimates included a decrease of approximately 40% for the first three months of the fiscal year. It is anticipated that revenue will exceed budgeted amounts as they are based on the prior year in which the runway was only partially open for eight months.

Expenses

The FBO has the same cost centers as the Administration and Operations enterprise center. Fuel costs are based on the prior year actual figures and decreased by 40% due to the runway closure. Unfortunately, this is extremely hard to predict as we are unsure what fuel prices will be as well as how much fuel will be sold during the closure.

Airport Capital FY 2024 Budget

Capital expenses such as equipment purchases, and construction costs are funded through the Capital Improvement Program (CIP). Capital funds include the Federal Airport Improvement Program (AIP), state grant funds, 6th penny funds, Passenger Facility Charges (PFCs) and rental car Customer Facility Charges (CFCs).

All the proposed projects for FY 2024 are detailed below.

	Total	Federal	State (WYDOT)	Guard	Other Funds	Airport
AIRFIELD						
Runway Reconstruction	24,180,346	17,994,723	719,789	4,849,195		616,639
Passenger Boarding Bridge	2,156,429	2,021,652	80,866			53,911
Snow Removal Equipment (SRE) Blower	1,066,667	1,000,000	40,000			26,667
LEASED SPACE						
Pavement updates (each year)	80,000					80,000
Post Office Parking Lot Reconstruction	535,550					535,550
FBO						
Ground Power Cart	50,000					50,000
TERMINAL						
Terminal Main Parking Lot Seal Coat	50,000					50,000
Terminal Parking Lot Construction*	1,383,281				415,362	967,919
Rental Car Lot Construction*	829,075					829,075
Electronic Messaging Board (Parking lot project)	5,000					5,000
TOTAL	30,336,348	21,016,375	840,655	4,849,195	415,362	3,214,761

The capital budget was presented to the Board at the March 2023 meeting and has been adjusted to accommodate the overall budget.

Items marked with * indicate projects that we will continue to collect funds (CFCs and 6th Penny) over several years but will be required to fund through reserves in the current FY. For the terminal parking lot, approximately \$823,361 will be collected using 6th penny funds. Based on our current collection rate, the funds will be fully recovered in four years. For the rental car lot, the budgeted about of \$829,075 will be collected in 11 years based on our current collection rate.

Cash Balance Forecast

As of April 15, 2023, the Board has \$6,035,389 in cash reserves. Of that, \$1,030,815 is currently restricted in investments. As indicated in the overall budget on page 6, approximately \$3,082,264 will need to come from reserves or debt services. At this time, the Airport has no outstanding debt service. Of that amount, \$697,217 is required to be paid for capital projects for our local match.

If using available cash reserves, the projected remaining cash balance at the end of FY 2024 would be \$2,953,125.
