**MEMORANDUM**

---

---

**TO:** Mayor Patrick Collins, and City Council  
**FROM:** TJ Barttelbort, Purchasing Manager   
**DATE:** September 20, 2023  
**SUBJECT:** Consideration to Purchase between the City of Cheyenne, and RCN Technologies for the purchase of Twelve (12) Connected Emergency Blue Light Call Stations

---

This is a Sole Source purchase through RCN Technologies, therefore no bids were requested.

RCN Technologies is the sole manufacturer of the RCN-BLCS-120V-CP920-3YR Call Light Product. As such, this purchase can only be fulfilled by RCN Technologies.

The City of Cheyenne Community Recreation & Events Department, Cheyenne Police Department, and Compliance Department has done extensive research on other comparable products, and RCN Technologies is the only manufacturer that meets all of their requirements to provide the required safety features.

The total requested purchase amount is \$145,301.60

Funding: 032-21-2113-45-43110 (SPOT / Downtown Projects Maintenance - 2021 Ballot)

## REQUEST FOR SOLE/SINGLE SOURCE PURCHASE

### DIRECTIONS:

Complete this form for all purchase requests with a sole/single source vendor. Send to the Purchasing Office before purchasing the item(s) along with the letter from the vendor indicating they are the sole/single supplier. **If over \$74,999.99, attach a copy of the legal ad and place on council.**

Name: Jason Sanchez

Date: 9/19/2023

Division/Department: Community Recreation and Events

ITEM DESCRIPTION: 12 Connected Emergency Blue Light call stations with mass notification systems and faceplate/overview cameras.

AMOUNT OF PURCHASE: \$145,301.60

STATE REASON FOR SOLE OR SINGLE SOURCE PURCHASE (CIRCLE ONE):

See attached sole source letter by RCN Technologies.

Signature of Requesting Individual: *Jason Sanchez* & Sam Payne

DIVISION/DEPARTMENT HEAD APPROVAL:

Name: *Jason Sanchez*

Date: 9/19/2023

COMMENTS: These are 12 emergency call stations to be installed at the Spiker Parking Garage, Cox Parking Garage, and the parking lot at Warren Ave. and 17th St. The intent is to increase safety and deter crime at these locations. Each station consists of a wireless internal phone system, warning beacon, mass notification system, and an integrated security camera.

### For Purchasing Office use only:

Dear City of Cheyenne,

This letter is to inform you that RCN Technologies is the Sole Source of the following solution(s) and/or service(s) proposed to the city per RCN Quote # 865-028139

- RCN-BLCS-120V-CP920-3YR

*Wireless WAN Enabled Emergency Blue Light Call Station with 120V Power*

*The solution is a proprietary solution manufactured and assembled at RCN's headquarters in Knoxville, TN. Due to the proprietary and confidential nature of certain elements including (but not limited to) design, materials, fabrication, assembly, parts, etc, RCN Technologies warrants it is the only manufacturer of this solution.*

*This configuration offered to the City is comprised of:*

- *Cradlepoint 4G R920 Router with 3-yr NetCloud Mobile Essentials Plan*
- *Antenna Group 45 Series Antenna bearing 2xCell, 2xWiFi, GPS*
- *IP Rated, 3ft Blue Light Call Station with Integrated Dial-Tone Gateway, Beacon, Alarm, IP Faceplate Camera, and Pole Mount*

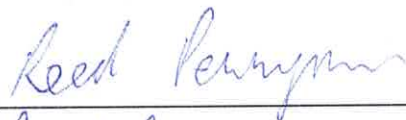

*And comprised of the following ecosystem services:*

- *Device Setup & Configuration/Provisioning for Cameras, LTE Gateway, and Dial-Tone Gateway*
- *RF Viability and Pole Placement Site Survey*
- *Professional Installation Services*
- *Network Operation Center (NOC) Support and Monitoring*

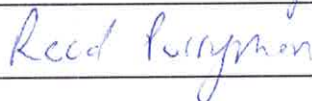

The above-named company or firm is the Sole Source of this ecosystem of solutions and services cited above, and no other company within knowledge consults, designs, engineers, deploys and supports such an ecosystem in the same manner.

Sincerely,

Signature of Company Official with Contracting Authority

# CONNECTED BLUE LIGHT PHONES

Reimagining Public Safety Through Innovative Connectivity Solutions

Shaping Safer Cities with Cellular Connectivity

## How Do You Protect Your Community?

Blue Light Emergency Phones are a crucial piece of safety infrastructure for communities across the United States. Ideal for placement in high-traffic areas such as school campuses, parks, town squares, and more, RCN equips those towers with the latest 5G and LTE technology to deter crime and keep people safe. The press of a button sends real time alerts to first responders and activates a powerful LED beacon that makes each tower easily identifiable – even during the daytime. Bridging the gap between safety, security, and simplicity, our Blue Light Emergency Phone solutions provide communities with a high visibility, instantaneous link to first responders.

The internal phone system is connected by VoIP technology, which uses a cellular connection rather than a physical line. By entrusting Blue Light connectivity to cellular, organizations don't need to worry about inclement weather, vehicle accidents, or vandalism forcing devices offline – because with wireless you offshore your liability from the pole or ground and gain reliability over the air.

### Key Features Include:

- ✓ Enterprise Cradlepoint LTE Gateway for Reliable Wireless Connection
- ✓ Integrated Dial Tone Gateway
- ✓ VoIP/SIP Integration
- ✓ Remote Programming
- ✓ Uptime Monitoring & Support
- ✓ World Class Manufacturer Warranties

### Optional Features Include: (May vary by model)

- ✓ AI Integrated Cameras with up to 90 Day Storage
- ✓ Solar Power
- ✓ Custom Coloring & Lettering
- ✓ Reflective Label Colors
- ✓ Battery Power
- ✓ Siren & Tower Cover
- ✓ Amber or Red Strobe Light Color

## Understanding the Scale of Connectivity

The RCN team recognizes each deployment zone is unique, which is why we require a site survey prior to installation. This helps our technicians familiarize themselves with the site, determine the best deployment strategy, and ensure a seamless installation.

9' Tower Phones

Call Stations

5'8" Pedestal Phones

## Beyond the Wire

Each of our three Emergency Phone Solutions can be equipped with solar panels, ideal for eco-friendly organizations or those with restricted power access. For locations with limited sunlight or deferred power usage, our unit offers a built-in 30Ah battery, allowing a pole to operate via battery power for a set period and then transition to solar. Moreover, this unit can stay operational for 3-4 days in the event of a power outage.

# CONNECTED BLUE LIGHT PHONES

Reimagining Public Safety Through Innovative Connectivity Solutions

Shaping Safer Cities with Cellular Connectivity

## A Turnkey Ecosystem

RCN offers customers an entire enablement ecosystem for Blue Lights. Our design specialists work with you for the right solution for your environment. Our wireless WAN experts ensure strong, reliable signal reaches your blue light, therefore maximizing uptime. Our service center and team simplify your deployment, and our NOC keeps you supported. A multi-vendor project has now become just one with RCN.

### Common Applications

*From school campuses to parks and everything in between, emergency phone systems can be installed anywhere. We've seen customers need emergency phone systems for:*

- ✓ Urban Areas
- ✓ School Campuses
- ✓ Greenways
- ✓ And More
- ✓ Corporate Campuses
- ✓ Parks
- ✓ Parking Structures

## Helping Langston University

Langston University, located in Langston, Oklahoma, needed its entire campus outfitted with Blue Light Emergency Phones. After laying the groundwork for an install by performing a site survey, our team concluded that the best solution was to modernize Langston's existing infrastructure using POTS Link and our Connected Blue Light Pole Solution.

*RCN was very responsive to our needs. We ran into some trouble with suppliers and RCN solved any of those problems at their own expense. A lot of companies would not have done that. That is something that we valued greatly.*

**Nicole Zoellner**

Contract Administrator for Langston University

After deployment, Langston University IT staff could now monitor their new solutions remotely and verify that each Blue Light Pole was online at any time. If an outage were to occur, their team would receive real-time alerts from our NOC Support Team, informing them of the issue and the current state of resolution.

If you have a project that requires emergency phone systems, please contact us via email at [sales@rcntechnologies.com](mailto:sales@rcntechnologies.com) to learn what we can do for you.
