

RESOLUTION NO. _____

ENTITLED: "A RESOLUTION REQUIRING THE STUDY AND SUBMITTAL OF A REPORT TO THE GOVERNING BODY ANALYZING THE BEST AVENUE FOR CORRECTING DEFICIENCIES AND IMPROVING AND MAINTAINING THE WEST ENTRYWAY TO THE MUNICIPAL BUILDING TO ENHANCE PUBLIC PERCEPTION AND EXPERIENCE."

WHEREAS, the City of Cheyenne's municipal building is located at 2101 O'Neil Avenue and originally opened in 1979;

WHEREAS, the municipal building serves eleven (11) City departments and approximately ninety-one (91) City employees, and also serves as the gateway for the general public to interact with the city government;

WHEREAS, the public's initial impression of the municipal building is important. However, the exterior conditions of the municipal building, and building grounds in general, are not ideal and while routine maintenance and upgrades have occurred, additional work remains;

WHEREAS, the west entryway to the municipal building serves as the main access-point for all community patrons and is the first element that community patrons encounter when arriving at the municipal building. As the first element that community patrons encounter, it is important that the entry be inviting so as to leave a positive impression with the visiting public;

WHEREAS, currently the main entrance to the municipal building requires additional improvements, with issues where soffits are rusted. The exterior brick is also failing, cracking vertically and breaking away from the existing structure. In addition, efflorescence is present on areas of the exterior brick, which detracts from the appearance of the municipal building;

WHEREAS, portions of the exterior pavement are also failing around the main entrance, notably through the deterioration of the pebble walkway, which failures present tripping hazards, further detracting from the appearance of the building;

WHEREAS, ingress and egress from the main entrance also suffers from deficiencies due to the age and current state of the doors at the entryway. These doors are often difficult to open and close and the security measures tied to the entryway can malfunction, which impairs the security of the building;

WHEREAS, the exterior landscaping around the main entrance has also not been adequately and consistently maintained, with shrubs and trees requiring trimming and planters needing to be cleared of debris, which issues also detract from the public's impression of the municipal building;

WHEREAS, beyond the aesthetic concerns surrounding the main entrance to the municipal building, there are also areas where the City is not in compliance with its own design standards and requirements, including failures specific to exterior materiality, lighting, and signage requirements as specified by the City's Unified Development Code; and

WHEREAS, ensuring the main entrance is well maintained and serves as an inviting gateway for the general public is important and must be a priority of the City.

NOW, THEREFORE, BE IT RESOLVED BY THE GOVERNING BODY OF THE CITY OF CHEYENNE, WYOMING, that the Public Works Department begin analyzing the process for improving the negative condition of the main entrance to the municipal building, and study the attendant costs for making such improvements;

BE IT FURTHER RESOLVED, that the Public Works Department report to the Governing Body not later than sixty (60) days after the effective date of this resolution detailing the results of the analysis and recommended steps for improving the conditions of the main entrance to the municipal building and for enacting a continuing maintenance plan to ensure the main entrance sustains a positive public impression;

BE IT FURTHER RESOLVED, that as part of the report submitted to the Governing Body, the Public Works Department shall prioritize and make recommendations on the order in which the City should address the deficiencies identified herein, and any other issues surrounding the main entrance to the municipal building, and specify the associated costs for completing the improvements;

BE IT FURTHER RESOLVED, that as part of the report submitted to the Governing Body, the Public Works Department shall also detail possible funding sources for completing such work and make recommendations on whether the work should be completed internally using City staff and resources or completed through third-party contract services; and

BE IT FINALLY RESOLVED, that upon submittal of the report, the Governing Body shall schedule a work session during which appropriate staff from the Public Works Department shall present the results of the study, the substance of the report and associated recommendations.

PRESENTED, READ AND ADOPTED this _____ day of _____, 2024.

Patrick Collins, Mayor

(SEAL)

ATTEST:

Kristina F. Jones, City Clerk
