DATE: March 8th, 2024

SUBJECT: Professional Service Agreement between the City of Cheyenne and DHM Design P.C., for engineering services of the 15th Street Master Plan Project.

Please find the attached Professional Service Agreement between the City and DHM Design P.C. for engineering services related to the construction of the 15th Street Project.

Engineering Staff evaluates fee proposals for engineering services based on time and material estimates for the specific project. Those costs are readily tracked and verified during design operations and the City only pays for the actual time expended. We believe this agreement will provide the required services to complete the final design and construction documentation portion of the project.

The fees include services for project management, all construction documentation, and final plan creation. Funding for this project will come from the 2019-2022 1% Optional Purpose Tax Fund (5th Penny). The total professional services will be a cost not-to-exceed \$153,055.00. We respectfully request your approval of this professional services agreement.

RE: 15th Street Detailed Master Planning and Construction Documentation

Mr. Cobb:

Thank you for the opportunity to provide this proposal for Landscape Architectural Design Services for the 15th Street Detailed Master Planning and Construction Documentation project. Per our previous conversations and site review meeting, DHM Design has prepared the following scope of work and schedule of professional fees:

PROJECT UNDERSTANDING:

We understand that the City of Cheyenne is requesting design services for the refined master plan and detailed construction design of the overall corridor, to incorporate the location of multiple train cars along the corridor. Through our initial efforts with the Reed Ave Corridor, we understand the historic locations of the old railway down 15th Street and the intent is to place the historic train cars as close to this historic alignment as possible. This will require the adjustment of the south curb & gutter, existing utilities within the street, adjusting pedestrian and vehicular streetlight locations and accesses into existing parking lots and business located throughout the corridor on the south side of 15th Street. Placement of new track sections will occur only in locations where rail car locations are identified through the master planning process. We will also maintain the existing driveway locations, pedestrian access points and layout of Gunslinger Park. Our intent is to blend the south anchor site of the Reed Ave. Corridor with 15th Street to create an overall cohesive design throughout the project corridor.

Our scope of work for this project includes an abbreviated master plan of the overall corridor, from Bent Ave. to the historic Cheyenne Depot. Upon completion of the refined master plan, we will begin to develop a detailed Design Development drawing package (60% final construction drawings) with a 95% construction drawing package and final bid documents, to follow. We also understand the critical timeline that needs to be met to have final drawings and approval from the City to meet the City's schedule for delivery of the renovated rail cars.
