

RESOLUTION NO. _____

ENTITLED: "A RESOLUTION APPROVING THE BUDGET OF THE CHEYENNE REGIONAL AIRPORT BOARD FOR THE FISCAL YEAR BEGINNING JULY 1, 2024 AND ENDING JUNE 30, 2025."

WHEREAS, the Cheyenne Regional Airport Board ("Board") was created pursuant to Ordinance No. 2407 adopted by the Governing Body on February 11, 1980, as amended;

WHEREAS, City Code Section 2.60.050(B) sets forth the requirement that the Board shall submit on or before the first day of May of each year, to the governing bodies of the city and the county, a proposed budget for the ensuing fiscal year;

WHEREAS, City Code Section 2.60.050(B) provides that the Board budget shall be subject to alteration, modification, and approval by the Governing Body in accordance with the policies of the City; and

WHEREAS, City staff has reviewed the proposed budget received from the Board.

NOW, THEREFORE, BE IT RESOLVED BY THE GOVERNING BODY OF THE CITY OF CHEYENNE, WYOMING, that the proposed budget for the Fiscal Year beginning July 1, 2024 and ending June 30, 2025 of the Cheyenne Regional Airport Board, as set forth in the attached information with this Resolution entitled "Cheyenne Regional Airport Operating Budget for the Fiscal Year 2025" in the total amount of ten million eight hundred seven thousand fifty-five dollars and seventy-five cents (\$10,807,055.75), is hereby approved.

PRESENTED, READ AND ADOPTED this _____ day of _____, 2024.

Patrick Collins, Mayor

Background

The following pages present the Cheyenne Regional Airport Board's operating budget for fiscal year 2025. The Board consists of five members, two members appointed by the City of Cheyenne, two members appointed by Laramie County, and one member appointed by the City and County in alternating terms. The Joint Powers Agreement sets forth the terms by which the City, County, and Airport operate. Under this agreement, the City and County annually review the Airport Budget. The City and County also sign all FAA grant agreements as co-sponsors. The Board operates under the authority of both an Airport Board under Wyoming State Statute and as a Joint Powers Board and holds ownership of all facilities, equipment, lease holdings, and operating rights.

The Board adopted a Certificate of Organization on July 1, 1980, pursuant to the City of Cheyenne Ordinance 2407 and Laramie County Commissioners Resolution officially forming the Airport Board and electing officers under W.S. § 10-4-101 through 10-4-107. Under W.S. § 16-1-104(d), the Airport Board was deemed a joint powers board.

For the year January 1, 2024 – December 31, 2024, the slate of officers is: Kevin Paintner, President; Dr. Jeff Storey, Vice President; Melissa Amick, Treasurer; Kim Brokaw, Secretary; and Keith Zabka, Member.

The Board's fiscal year is from July 1 – June 30 each year. Once the Board approves the budget it is submitted to the City of Cheyenne and Laramie County for review by May 1st of each year.

The Board operates the Airport as a business enterprise to be financially self-sufficient. The Airport does not have the authority to tax and does not use local tax dollars, property tax or sales tax. The Airport is funded through fees paid by airport users, including airlines and businesses that operate at the airport.

Community/Economic Impacts

The airport is a key piece of infrastructure for our community, connecting citizens and employers to the country and globally. The airport supports not just passenger travel, but also the Wyoming Air National Guard and the State of Wyoming, among many other consumers. According to the [Wyoming 2020 Aviation Economic Impact Study](#), Cheyenne Regional Airport's commercial air services and airport activities provide over \$27.5 million in annual economic activity to the community, including \$4.98 million for business tenants. Wyoming airports provide over 20,000 jobs.

Additionally, Wyoming airports have approximately 3,628 business tenants across the state. Included in the amount are the approximate 60 tenants at the Cheyenne Regional Airport including:

- Land leases to 21 various tenants including the Wyoming Air National Guard, the Wyoming Department of Transportation, and the City of Cheyenne.
- Hangar rentals to 12 tenants including Alpine Air, the Flying School, and Reach

- Air Medical Services.
- Commercial leases to 29 tenants including various doctors, dentists, the US Postal Service, DFS, and WYDOT Aeronautics.

Cheyenne Regional Airport Board Budget Summary

Impacts

Air Service

The past few years have had a significant impact on the Airport's air service. During 2020, we saw traveler numbers reduced due to the COVID-19 pandemic. From 2020-2023 we saw decreased travelers due to the runway reconstruction and several required full and partial runway shutdowns.

In September 2023, the Airport's final phase of the runway reconstruction was completed, and the Airport was able to return to full air service. Even with no air service from April to September, the Airport saw 12,992 emplacements. In 2022, there were 19,511 enplanements. Prior to the pandemic and runway reconstruction, there were 15,888 enplanements in 2019. At this time there is no anticipated future impact to air service.

Summary

This year we are presenting the budget with two enterprise centers. The enterprise centers include Airport Administration and Operations and Fixed Based Operations (FBO). Revenues, and expenses for the various enterprise centers and their associated cost centers are outlined in the following pages.

Presented on pages 4-6 is a chart summarizing the Airport Board's total budget for the fiscal year 2024 (July 1, 2024-June 30, 2025). We are expected to have net operating income of \$340,362 with a net loss of \$656,319 including all capital expenses.

The blue color indicates that it is an amount received/paid by the Airport. The orange color indicates amounts received/paid using other funds such as 6th penny funds, Wyoming Air National Guard, federal, and state grants.

Airport Administration and Operations

The Airport's operating budget is a stand-alone enterprise center separate from the FBO operations. All revenues generated from the operation of this enterprise center, including rents, commercial landing fees (other than FBO landing fees), and other operating fees, will be used to offset the expenses related to airport operations. This budget year the airport will use Airport reserves for operating/capital expenses in excess of revenues.

The income (loss) from airport operations for FY 2025 is anticipated to be \$268,491. The specific details for the airport administration and operations enterprise center are outlined on pages 7-10. The Airport's capital plan can be found on page 13.

Revenue

Aeronautical revenues are collected from both the fixed base operator and the airlines as well as other aeronautical users of the airport. Non-aeronautical revenues are collected from a variety of sources including terminal concessions, rental cars, and lease revenue. These revenue streams are used to fund cost-center expenses. There are five revenue centers for airport administration and operations including air carriers, leased space, rental cars, concessions, and other income. The total amount of revenue expected to be collected by Administration and Operations is \$3,101,309. A more detailed review of the anticipated revenues and sources for each of these profit centers is below.

Air Carriers

Air Carrier income is derived from three sources: landing fees, terminal rents, and Passenger Facility Charges (PFC). Landing fees and terminal rent revenues are used to offset expenses related to the airfield and terminal operations. PFC revenues are used to reimburse the Airport for approved projects previously completed.

Due to the inconsistent air carrier income over the past several years, a conservative estimate is \$170,664 for fiscal year 2025. Of this, \$64,056 is terminal space rental, \$25,044 is landing fees, and \$81,564 are PFC's.

Leased Space

The Airport currently has approximately 70 leases with various tenants including the Wyoming Department of Transportation (WYDOT), Wyoming Air National Guard (WANG), the City of Cheyenne, and the State of Wyoming. The leased space includes building rent, land rent, hangar rent (excluding community hangar), terminal rent (excluding rental cars and air carriers), and storage rent. The leased space revenue is used to offset the expenses in the "Leased Space" cost center.

The budget does include a 3% annual increase in rent for inflation but this may vary as we are unsure what the Consumer Price Index (CPI) will be during FY 2025. Leased space revenue for fiscal year 2025 is anticipated to be \$2,364,337.

Rental Cars

Rental car revenue is predominantly composed of minimum annual guaranteed amounts (MAGs). The on-airport rental car companies are required to pay 10% of

gross revenue or their MAG, whichever is higher. This is included in the concession revenues below.

The rental cars also pay rent for space in the terminal which is used to offset expenses in the “Terminal” cost center. The rental cars pay rent and utility costs for the use of the wash bay facility. These fees help to offset the cost of operating the wash bay which is included in the “Leased Space” cost center. The amount of rent revenue from rental cars for fiscal year 2025 is anticipated to be \$8,226.

The third type of rental car revenue is Customer Facility Charges (CFC) which are collected and held to offset rental car-related approved projects. This revenue is anticipated to be \$94,976. The rental car revenue for fiscal year 2025 is anticipated to be \$103,202 excluding the concessions.

Concessions

Usually, most of the income from concessions is received from restaurant revenue. At this time, there is no active restaurant, so no restaurant concessions have been incorporated into this budget. Other concession revenue includes rental car concessions, ATM concessions, vending machine concessions, and ride-share concessions.

All concession revenue is dependent on activity level and is hard to predict depending on market fluctuations. The concession revenue stream helps to fund the “Terminal” cost center. Revenue is budgeted to be \$180,364 for fiscal year 2025.

Other Income

Other income includes interest income, advertising income, sixth penny sales tax (still being collected for parking lot) and other airport revenue such as badging fees. The budgeted amount for fiscal year 2025 is \$282,742.

Expenses

Budgeted expenses for airport administration and operations total \$2,804,038.

Operating expenses exclude FBO expenses and capital expenses as those are reflected in separate budgets on pages 11-13 following the detailed cost center information.

The number of full-time equivalent staff for Airport administration and operations (non-FBO) employees is currently 11 with two vacancies expected to be filled for this upcoming fiscal year 2025 and incorporated into the budget. Incorporated into the budget for both administration/operations and FBO is a 5% raise for all full-time employees which will ultimately vary from 2.5% to 5% depending on their annual employee evaluation. Finally, there is a 5% adjustment, for both administration/operations and FBO, for employer-provided benefits excluding health insurance which is not anticipated to increase for FY 25 unless employees change from their current selection (i.e. individual or family) in the course of the year.

Also incorporated into this budget is an increase in insurance premiums, for both administration/operations and FBO. Per discussions with our insurance company, rates in the area are expected to increase 25-30% for FY 25. We increased our budget for employee training and IT hardware to incorporate the purchase of new computers that are hitting their life cycle. Finally, we increased the budget for repairs/maintenance and supplies as aging infrastructure requires additional repairs.

There are five direct cost centers for the Airport: Administration, airfield, leased space, other buildings and grounds, and terminal. There are 16 corresponding expense categories. The expense categories include areas such as personnel expenses, utilities and building expenses, operations and maintenance expenses, and equipment expenses.

Administration and Operations Cost Center

This cost center includes all administrative and operations expenses that were not specifically assigned to another cost center. This also includes expenses related to administrative and operations staff expenses.

Airfield Cost Center

This cost center includes the costs associated with the airfield and air carrier apron including snow removal, aircraft rescue firefighting, operations and maintenance expenses, and utilities expenses. This cost center is offset by revenues collected by Air Carriers.

Leased Space Cost Center

This cost center includes all expenses related to our leased property. This cost center also includes the airport-owned hangars, the rental car wash bays as well as aeronautical and non-aeronautical tenants. This cost center is offset by revenues collected by the Rental Cars and Leased Space revenue centers.

Terminal

Included in the terminal cost center are all costs associated with the terminal building

including repair and maintenance, custodial, utilities, the parking lot, baggage system and certain security items related to access control (cameras, doors, alarms). This cost center is offset by revenues collected by Air Carriers, Rental Cars, and Concessions revenue centers.

Other Buildings and Grounds

This cost center includes the expenses associated other grounds at the airport including the parks and grassy areas as well as roadways at the Airport.

Airport Fixed Based Operations (FBO) FY 2025 Budget

The Fixed Based Operations (FBO) operates as a separate enterprise center. It is anticipated that for FY 2025, the FBO would have a total net income of \$223,272.

Revenues		FY 2025 Budget
	Fuel Revenues	\$ 3,636,721.19
	FBO Services	\$ 101,017.43
	Community Hangar/Ramp Fee	\$ 147,999.28
	Misc. FBO Sales	\$ 876.87
	Fuel Resale	\$ 2,669.05
	Ground Handling Fees	\$ 500.00
	Loading Fees	\$ 247.50
	Overtime Fee	\$ 150.00
	De-Ice Fee	\$ 1,041.68
	De-Ice Resale	\$ 26,052.63
	Fuel Flow Fees	\$ 76,912.32
	State Fuel Tax	\$ 26,909.00
	Total FBO Revenue	\$ 4,021,096.94
Expenses		
	Personnel Services (Payroll)	\$ 657,357.54
	Repairs and Maintenance	\$ 30,012.88
	Utilities	\$ 35,934.68
	Supplies and Products	\$ 10,570.49
	Fuel and Purchases for Resale	\$ 2,775,720.54
	Miscellaneous	\$ 38,228.40
	Total FBO Expenses	\$ 3,547,824.53
	Net FBO Operating Income (Loss)	\$ 473,272.42
	Capital Expenses	\$ 250,000.00
	Net FBO Income (Loss)	\$ 223,272.42

Revenues

The FBO has the following revenue centers: Fuel sales (Skywest, Military, Contract, Other), FBO services, and miscellaneous revenue.

Revenues for the FBO are hard to predict due to the past several years being inconsistent. For a conservative estimate, we averaged FY22 and FY23 revenue for FBO Services and Misc. Revenue.

Fuel revenues were estimated based on partial FY 23 and FY 22 sales due to our runway closure in FY 22, and factored in a 10% decrease due to trends across the nation for FBOs.

Expenses

The FBO has the same cost centers as the Administration and Operations enterprise center. The FBO has seven full-time employees and three part-time employees with an additional part-time employee anticipated to be hired in the next few months. Fuel costs are based on a combination of FY 23 and FY 22 expenses and are decreased by 10% decrease due to trends across the nation for FBOs. Unfortunately, this is extremely hard to predict as we are unsure what fuel prices will be in the upcoming year.

Airport Capital FY 2025 Budget

Capital expenses such as airfield equipment purchases and airfield construction costs are typically funded through the Capital Improvement Program (CIP). Capital funds include the Federal Airport Improvement Program (AIP), state grant funds, 6th penny funds, Passenger Facility Charges (PFCs), and rental car Customer Facility Charges (CFCs). All the proposed projects for FY 2025 are detailed below.

	Total	Federal	State (WYDOT)	Other	Airport
ADMINISTRATION					
Master Plan	1,066,667	1,000,000	40,000		26,667
AIRFIELD					
Ramp Repair (Bldg #20)	281,000				281,000
Inlet Replacement (Bldg #30)	250,000				250,000
ATCT	850,000	796,875	31,875		21,250
Runway 9-27 (Eastern 1/3) Pavement Study	75,000		67,500		7,500
OPERATIONS					
Snow Removal Equipment (SRE) Blower	1,087,005	1,015,577	40,623		30,805
Pavement updates (each year)	80,000				80,000
Building Parking Lot Overlay (Bldg #125)	230,000				230,000
Two Operations Vehicles	100,000				100,000
Garage Door Replacements	14,800				14,800
Mowers	50,000				50,000
FBO					
Building #40 Renovations	250,000				250,000
TERMINAL					
TOTAL	4,334,472	2,812,452	179,998	-	1,342,022

Cash Balance Forecast

As of March 31, 2024, the Board has \$2,883,244 in cash reserves. Of that, \$874,377 is currently restricted in investments and unavailable until October 2025. As indicated in the overall budget on page 6, approximately \$656,319 will need to come from reserves or debt services. Currently, the Airport has no outstanding debt service. Of that amount, \$86,222 is required to be paid for capital projects for our local match.

If using available cash reserves, the projected remaining cash balance at the end of FY 2025 would be \$1,352,548.
