

RESOLUTION NO. _____

ENTITLED: "A RESOLUTION SUPPORTING THE CHEYENNE REGIONAL AIRPORT BOARD IN THE APPLICATION FOR AND ACCEPTANCE OF FEDERAL ASSISTANCE FROM THE FEDERAL AVIATION ADMINISTRATION UNDER THE BIPARTISAN INFRASTRUCTURE LAW TO ASSIST IN THE REHABILITATION OF THE AIR TRAFFIC CONTROL TOWER."

WHEREAS, the Cheyenne Regional Airport Board desires to participate in the Federal Aviation Administration grant program under the Bipartisan Infrastructure Law ("BIL") to assist in funding costs related to the rehabilitation of the Air Traffic Control Tower ("ATCT");

WHEREAS, maintaining the ATCT is crucial for preserving air service at Cheyenne Regional Airport ("CYS"). The air service plays a key role in improving the transportation to and from the city of Cheyenne, which increases tourism and positively impacts the local economy. In addition, by having the ATCT, it encourages other potential air carriers to consider the airport when expanding air service;

WHEREAS, the ATCT is staffed with Air Force Air Traffic Controllers (Squadron 243rd) and is used for training controllers. The rehabilitation ensures that ATCT personnel can continue to use the facility, preserving their current good-paying positions and generating additional employment opportunities as trained personnel transition to other ATCTs for long-term careers. Additionally, the project will include good-paying jobs for construction;

WHEREAS, The existing tower is part of the national airspace system and supports commercial, general aviation and military aircraft. This rehabilitation is necessary to ensure that the ATCT remains operational. Without an investment into the facility, the tower will approach end of life condition and will struggle to support the national airspace. The tower also plays a vital role for the Air National Guard (ANG). This facility is used for training controllers for the Air Force. The required maintenance for this tower is necessary for the continued support of the ANG and the surrounding community;

WHEREAS, the building assessment that was conducted in 2021 determined that the ATCT building requires rehabilitation that includes sealing for water intrusion, replacing doors and windows, and other general building repairs to improve personnel safety and overall life expectancy of the building. Additionally, HVAC and electrical improvements are required to keep the existing equipment operational and to improve energy efficiency;

WHEREAS, minor maintenance needs to be conducted on the elevator and the associated electrical and mechanical components to ensure that the building maintains ADA compliance. The design will also look at ways to improve ADA accessibility;

WHEREAS, the existing facility has poor energy performance, specifically in HVAC and Electrical infrastructure. Building renovations will adhere to LEED standards wherever feasible,

to reduce energy consumption, enhance indoor environmental quality, improve resiliency, and ultimately decrease carbon emissions to further reduce long-term impacts on the climate;

WHEREAS, the Governing Body recognizes that the Cheyenne Regional Airport Board is unable to conduct the required rehabilitation of the ATCT without obtaining available funds to complete this project;

WHEREAS, the Cheyenne Regional Airport Board proposes to file an application with the Federal Aviation Administration for grant funding under the BIL for the costs associated with the design and construction of the rehabilitation of the ATCT in the amount of up to eight hundred fifty thousand dollars (\$850,000) over a 5-year period in entitlement funds under the new legislation to fund the Project;

WHEREAS, Once the final amount has been established, then the airport will submit the final application for the funds. It is anticipated that the FAA will issue the grant sometime during the coming months, but it could possibly be in September prior to the end of the federal fiscal year (September 30, 2024); and,

WHEREAS, the grant is 93.75% FAA funded with the remaining funding provided by the WYDOT Aeronautics Commission at 3.75%, and the Cheyenne Regional Airport Board at 2.5%.

NOW, THEREFORE, BE IT RESOLVED BY THE GOVERNING BODY OF THE CITY OF CHEYENNE, WYOMING, that the City of Cheyenne supports the grant application to be submitted by the Cheyenne Regional Airport Board to the Federal Aviation Administration under the BIL in the amount of up to eight hundred fifty thousand dollars (\$850,000) over a 5-year period to assist in funding costs related to the PBB.

BE IT FURTHER RESOLVED that if the grant application described in this Resolution is approved, the Mayor and City Clerk are authorized to sign the related grant agreement or agreements if spread over more than one grant, and other associated documents which may reasonably be required by the Federal Aviation Administration to finalize the grant(s) transaction.

PRESENTED, READ, AND ADOPTED this _____ day of _____, 2024.

Patrick Collins, Mayor

(SEAL)

ATTEST:

Kristina F. Jones, City Clerk
